Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Double Patenting

Claims 1-39 stand provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-31 of copending Application No. 10/029,014. Although the conflicting claims are not identical, they are not patentably distinct from each other because as shown in the prior action, the claims are obvious over the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-39 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Bourat of record for reasons of record in view of Ogle of record for reasons of record.

Response to Arguments

Applicant's arguments filed 9/20/04 have been fully considered but they are not persuasive.

With regard to the combination of the two references applicants argue that there would be no reason for one skilled in the art to consider the teachings of Ogle in order to produce the claimed electrophoresis apparatus. The Ogle patent was cited as a teaching reference to show that one having ordinary skill in the art of electrophoresis would know that depending on the materials being separated, such membranes, having defined pore sizes are needed to allow the separation to occur. Accordingly, the invention as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the disclosure of the Bourat patent with the teachings of the Ogle reference, because the Ogle reference teaches that such use of the electrophoresis membrane would allow the purification of the macromolecules as claimed.

Additionally, the term "electrophoresis separation membrane" may read on other membranes used in electrophoresis, including some of the membranes taught by Bourat. However, the rejection is made as a combination of Bourat and Ogle to further solidify the rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
